Printing Presses

Original Heidelberg 10 x 15 Platen letterpress (windmill). Gold Medallion Serial 42176 E with rollers and die cutting jacket. Two up attachments for feeder and delivery, Business card attachments and side guides for small sizes. Register attachments and all original tools. Operation and parts manuals (original). Accessory for printing 6 ¼ remittance envelopes. Custom made tube to store/soak wash-up handle with squeegee.

We bought this press new and have given it excellent care. Comes with 2 regular chases, 1 skeleton chase, motor control and fused disconnect, liquid non-offset spray and drying heat lamp.

Original Heidelberg Cylinder 15 x 20 ½ Gold Medallion Serial No. 957/429-40
Power voltage 220, control voltage 115, Current AC, Phase 3, Cycles 60, Main motor 5.4 HP 17 amp.

Comes With:

- 2 feed trays
- 2 delivery trays with rollers
- device to fill feed tray while running
- device to empty delivery tray while running
- 2 up feed attachment with register from either side
- 2 up delivery attachment while jogging
- high tension anti-static bar
- 2 regular chases
- 1 skeleton chase to lock form against bed
- 1 chase loading tray to make loading easy
- powder non-offset spray
- wash up attachment
- complete set of rollers plus extras that came with press
- die cutting jacket
- all original tools and accessories

We bought this press new and printed mostly high school newspapers. In later years it was used for die cutting, scoring and numbering. We never ran it more than a day or two a week and have given it excellent care
